continent for many years but after the fall of King Bahadur Shah Zafar the shortages became the weakness of the Muslims of sub-continent which demoralized the status of the Muslims, in which they were defatted and brought one of the wretched nations at the Subcontinent. Hindus came in power and depressed the Muslims from all corners, such behavior compelled the Muslims of subcontinent for struggle for homeland therefore the leaders of the Muslims were united to struggle for the land in which they could live peacefully. In 1940 one of the resolutions agreed to be passed for separate home land for the majority living Muslims at Miner-e- Pakistan Lahore. At least Pakistan was achieved after long struggle at 14th August 1947 as Islamic State on the Map of the world.

Relations:

From the day of beginning Pakistan fastened her relations with neighboring countries such as Iran, Afghanistan, China, and Islamic States such as Saudi Arabia, Gulf States, Iraq, and Syria. Among all States Saudi Arabia was one of the most important States which has close and bilateral relations with Pakistan. Which is based on unbreakable ties such as Kashmir dispute, nuclear problems and military ties in such ties both Islamic states supported each other in most difficulties. Saudi Arabia has only not been in frontline to support Pakistan for core issues but she has always been in supporting such as Political, Religious, and Strategic relations.

Being most constant friend of Pakistan the Saudi Arabia has always been supporting the fundamental issues i.e. Kashmir etc. and it admirably facilitated Pakistan to meet any challenge related to Muslim Ummah and Pakistan itself.

Challenges:

There has always been an achievement for both Islamic States but both Islamic States have witnessed the many challenges which have jolted the sovereignty of both Islamic States i.e. “Jihad” “terror attacks” and the unpleasant situation of Iran and Israel with Saudi Arabia. These above mentioned issues have always created problems for both States or tried to deteriorate the relations between Islamic States. “Jihad” is one of the complications which has always been controversial among the Non-Islamic States and has been considered a threat. “Jihad” being the most holy sect of Islam created many problems for Saudi Arabia in 21st Century especially after 9/11 attack which was associated with it and considered that Pakistan and Saudi Arabia are only Islamic States who sustenance the “Jihad” movement in the world.

Consequently, Natana De Long -Bas highlighted the “jihad” in her written (Wahhabi Islam from revival and reform to global jihad paper back

August 22, 2008), that the Wahhabi fanaticism do not have their back ground such as weight on “jihad” killing and aggressiveness.

Connecting this Jamal Bitter (Prof. University of Toledo) elaborates in his commentary Saturday 11/21/2009 that the sect Wahhabism is the greatest challenge of the 21st Century. He further argues regarding the “Jihad” that it is only the way to detention the power nothing different.

Accordingly, Waqas Sohrab, Ishtiaq Ahmed Chaudhary commented in their statement with the Caption of (Pak -US) relations in 21st Century March, 2012 that the attack on United States changed the scenario of the world and Afghanistan became the Centre of the great game. Accordingly, the Afghanistan stands warning to Pakistan. The devotees of USA financed her to outbreak against all who were involved in the attack of 9/11.

Context of the Study:

This study aims to study the Relations, Challenges and Opportunities in 21st Century of Pakistan and Saudi Arabia. The both Islamic States enjoy the power of freedom as laid by their own history. These Islamic States neither neighbor nor do enjoy the same language but are uniting being Islamic States and having a same “Sharia Law” as prescribed in Holy Quran. Their cultures are different along with their languages but they are much close from each other obligating the Islamic ties and law being Muslim States in the world. However, there are many challenges and opportunities which are consistently faced by both Islamic Countries. Therefore, this study finds out the challenges and opportunities in standpoint of many issues in 21st century being faced by both Islamic States.

Historical Background of Pakistan and Saudi Arabia:

Pakistan is one of those States among the other world countries predominantly and Muslim States especially which was achieved after the long and difficult struggle. It was second Islamic State after Medina Sharif (Saudi Arabia) which was achieved by the name of Islam. The State of Pakistan witnessed many situations before being State of an Islamic. “Islami Jamahiriya Pakistan” got freedom dated on 14th, August, 1947.

However, the position of the Muslims at that moment was much depressed considered that the Pakistan State would not survive to continue as State for long time it might once again be annexed into India. Pakistan faced may troubles after its freedom due to injustice decisions of Sir Red Gulf, who unjustly annexed the cities in India than Pakistan territory such as Pathan Kot, Batila where Muslims were in majority but these places were unjustly annexed with India. Gordaspor being a crucial area was handed over to India so that India may approach to Kashmir easily and it be kept

unresolved issue for long time. The settlement of the Migrators was one of the core issues of Pakistan in which many migrators were slaughtered during migration to Pakistan by Hindus and Sikis. The distribution of the properties and water issue was also a challengeable situation for newly established Islamic State which left unsolvable condition for Pakistan until now.

Pakistan enjoys bilateral relations with all neighbors except India. While the relations between Pakistan and China is exceptional regarding many issues such as CEPC etc. Pakistan is only the Muslim country which enjoys the power of atomic including the latest technology of war weapons. Pakistan also enjoys parallel relation with neighboring countries. Since the inception of Pakistan Iran is first Muslim State which accepted the sovereignty of Pakistan among the world countries.

The Importance of Saudi Arabia:

Saudi Arabia is one of the States of the world which occupies most of the Arabian Peninsula. The countries which are neighbors of Saudi Arabia are Jordan, Kuwait, Iraq, Qatar and United Arab Emirates. It is one of the small States as measured by its range of power among other States of the world but plays an important role in the international politics. Saudi Arabia itself enjoys very equal and much important status among the rest of the world nations particularly with United State of America.

While the most important which keeps Saudi Arabia on unique place is to promote itself as the leader of the Muslims and Arab States on the basis of religious. Since 1972 it was mostly considered that the Saudi Arabia lacking the military power would use its oil as political weapon and it would only the State which could compel the Superpowers to change their policies towards Israel.

9/11 and its Effects on Muslims and Saudi Arabia/Arab Natives:

This attack not only jolted the United States but whole world and it affected the Muslims around the world specially natives of the Saudi Arabia because Al-Qaeda links were connected with Saudi Arabia. Therefore, Arab Americans who were living peacefully at United States got victimized this directly.

O' Brien, 2011, comments that the attack of 9/11 embarrassed the United States authorities to modify polices against the Arab States and such aggression brought much challenges for the Arabs regarding the security and basic rights at United States, while Ali, 2011, also points out that the many Arabs claimed that they were being insulted disheartened and chanted terrorists while many being suffered psychologically and depression.

The 9/11 attack brought much misfortunes for the Muslims and especially for the Arab Americans and their education at United States. They extremely suffered in the educational settings, enrollment problems while attending their classes at United States. (Bahgat, 2004), further elaborates that the modifications in the procedures concerning the education affected the Arab Americans from all corners.

TAS, 2013, elaborating the scenario after the 9/11 attack that it brought many challenges including creating pressure, embarrassment and uneasy feelings for the Arab Americans. The changing / modifying the strategies and media hostility much hurt the Arab Americans and Saudi Arabia students directly or indirectly. The media aggression much targeted the Middle East and natives while pointing them responsible of the 9/11 attack.

Despite of all what happened on the day of September, 11, 2011, created much tension around the world and affected the United States especially. However, Muslims were charged and called the responsible for the attack. In this regard, many Muslims while living at United States or other allied countries were badly targeted by and large while connecting to the 9/11 attack, and some were forced to go to back their homelands and few got gap while in communication at local level.

Challenges to Saudi Arabia and Pakistan:

Saudi Arabia and Pakistan have unique relations among all countries of the world. However, there have been many challenges which created impossible catastrophes for both Islamic States such as a “Jihad” “Militancy” and Taliban (Afghan Mujahedeen) accordingly. The “Jihad” interconnected to the Wahhabi Islam has always left the rumor that the both Islamic States having a trainers and supporters to boost up the “Jihad” in the region and to use it against someone when required,

Natana De Long -Bas highlighted the “jihad” in her written / publication (Wahhabi Islam from revival and reform to global jihad paper back August 22, 2008) that the Wahhabi fanaticism do not have their back ground such as weight on “jihad” killing and aggressiveness.

The Professor of Inter Disciplinary Studies at the University of Toledo Jamal Bitler points out in his commentary Saturday 11,21,2009 that the greatest challenge in 21stCentury is Wahhabism, which is only obstacle to flattering heated with the rest of the world and just design to make a fool the devoted Muslims and to capture the power.

David Commons in his book “the Wahhabi Mission and Saudi Arabia” Sketching the relationship between Pakistan and Saudi Arabia and the promotion of Wahhabism in Pakistan is one of the most basic reasons to

bring both States close to each other. Consequently, arguing further that it has always been trend to support Pakistan for boosting up sectarianism providing uncountable funds.

Saudi Arabia and Pakistan Strategic Alliance for 21st Century:

Pakistan and Saudi Arabia keeping strong relations in tight chains almost 63 years on the best interest of their national issues, the both Islamic countries continue their talks in continuation to achieve their goals against the issues which cause to destabilize them time and again. Many issues compelled them to stand shoulder to shoulder. The relation between both countries has been remarkable on many issues therefore in 1951 the both Islamic countries established a “Treaty of Friendship”.

The sentiments of their friendship got boosted when the King of Saudi Arabia visited Pakistan in 1954; the visited King time and again articulated that the power of the Pakistan will be considered the power of Islamic countries predominantly the Saudi Arabia.

Since in 1960 the visit of the Ayyub Khan opened once again the new chapter of relations between the Islamic States. It was Ayyub Khan’s broader vision which got agreed Saudi Arabia to have trusted bilateral relations with Pakistan. Consequently, Saudi Arabia allowed technical and non-technical manpower from Pakistan to stable the Saudi Arabia’s new established factories and businesses.

In 1965 war the Saudi Arabia was only country which backed the Pakistan from all corners behind its limitations against the Indians attacks. In favor of all such supports the Pakistan also supported Saudi Arabia wherever required. Early 1960 brought much disturbance for Saudi Arabia due to crises broke up in Egypt and Yemen accordingly, to face such situation Saudi Arabia needed much support to get rid of from this due to its limited force. Pakistan being closer friend of Saudi Arabia supported her to defense her forces.

Therefore, in such consequence it would be little bit difficult for them to remove such situation.

The four (4) participants strongly disagreed and mentioned that the Pakistan and Saudi Arabia would have difficulties to meet the challenges of current situation, especially the nurturing condition of militant groups which have determined links at their States, therefore they have to travel long to remove the tensions and control the situation. However, the participants who did not put their concepts in this concern were six (6).

Fourteen (14) participants agreed that Pakistan could play fundamental role to bring Iran and Saudi on one table to ease the tension between them because she is only State which enjoys the bilateral relation with them.

However, ten (10) participants disagreed from such point of view due to breakable relations. The main clue which keeps obstacles between both States is committed of spiritual dogmas and such situation would never permit the both Sates to be one solution. In such position Pakistan will not be able to play energetic role to bring stability among both Sates.

These are only countries which have almost distressed the relations among the Islamic Sates, if these two come on table talk so there would not be any motive to get Middle East flourished. Thus, it may be dealt with iron hands forthwith, however delay will throw the Sates in hurdles. However, both States are in position to overthrow the activities of ISIS and militant groups individually.

The eight (8) subjects disagreed from this suggestion that the authorities of both Islamic States are not in such position to face the activates of the ISIS and allied groups at their regions which have strengthened their roots last one decade. There are many uncountable groups linked to ISIS have troubled the both nations while targeting their public and resources. While seven (7) members strongly disagreed that the growing reputation of the ISIS and militants might be open challenge for both States. Looks like that the ISIS and its operations might be heavy pressures for these Islamic States.

Saudi Arabia and Pakistan could play pivotal role to bring constancy in the region. While eight (8) participants agreed that the problem of Yemen would certainly influence the dealings between Pakistan and Saudi Arabia, because Saudi Arabia had trusted that Pakistan would have taken a part in the conflict but Pakistan did not. While the eight (8) participants strongly agreed that the Saudi Arabia would feel anxiety in future concerned its policies towards Pakistan due to this sudden change. It may weaken the relation between Pakistan and Saudi Arabia in future.

The six (6) participants strongly disagreed that there would be no effect on Pakistan and Saudi Arabia's relation due to Yemen conflict because the Saudi Arabia knows about many worries related to Pakistan; hence it would not affect the relations of both States. Question no. 12

This question is based on “would revolt of India unstable Pakistan and Saudi relations in 21st century.

	Frequen cy	Perce nt	Valid Percent	Cumulative Percent
Cannot say	4	10.0	10.0	10.0
Strongly Disagree	4	10.0	10.0	20.0
Disagree	9	22.5	22.5	42.5
Agree	13	32.5	32.5	75.0
Strongly Agree	10	25.0	25.0	100.0
Total	40	100.0	100.0	

Thirteen (13) participants agreed that the revolt of India would unbalance the ties of Pakistan and Saudi Arabia in 21st Century. India is one off emerging countries in the world. It has diverted many countries towards its large and strong business. In the standpoint of such influences it can only replace Pakistan and has always been in chance to decline the two-sided relations of Pakistan and Saudi Arabia at any cost. Connecting to this there is equal chance to unbalance the Pakistan and Saudi Arabia dealings in 21st century.

However, ten (10) participants strongly agreed that uprising India could bring some obstacles between Pakistan and Saudi Arabia in future. In recent past it has created much tensions to get involved Pakistan in multiple issues. She has always blamed Pakistan being the supporter of

Concerning to the role to be played by both States among Muslim Ummah in 21st century, if Pakistan and Saudi Arabia are united on one page so they could solve the all disputes concerned to the Muslims at the world. Both States are enjoying equal Status among the Muslim countries particularly and to the world especially. Saudi Arabia being the Sunni sect origin could play vital role among the Islamic States except the Iran which follows the Shia sect. The all Sunni sect followers do respect the Saudi Arabia due to leading the Muslim Ummah on the behalf of religion.

On the other hand, Saudi Arabia by itself has been financially well sounded to play pivotal role among the all Muslim States. It has also benefit while enjoying the writ of the Islamic Law which is acceptable to the all Muslim countries in a perspective of religion. It has always been very plus point to the Saudi Arabia that the religious scholars have always supported her due to Islamic Sharia law. It is only the Islamic State which enjoys bilateral relations with United Nations Organizations (UNO) being donor and enjoys very close ties with Veto Powers as well and has been strengthen in relations with most populated countries such as China and India.

Regardless of all these, Pakistan is the only Islamic State which maintains the unique position being the atomic power in the world. However, it is only Islamic State after Medina Sharif (Saudi Arabia) which was achieved by the name of Islam. It strategically enjoys the most crucial status at Asia and keeps the most trained forces and sophisticated weapons to face the any threat made to her or Islamic States at the world. On the behalf of all these circumstances Pakistan enjoys the most appreciated status and acceptable role in Organization of Islamic Cooperation (OIC) among the Islamic Countries and has good relations with all neighbors in the South Asian Association Regional Cooperation (SAARC) plate form accordingly.

Observing the status of both Islamic States it could be considered that the both States could play crucial role to get united all Muslim States with enhanced relations with other world countries as well. They are strengthened to solve the all burning issues and to ease the tension between Islamic States as well.

Pakistan and Saudi Arabia are in enhanced position to make defense shield to protect the all oppressed Muslims at the world while using their bilateral relations with other Non-Islamic States. Pakistan being the atomic power and Saudi Arabia being the leader of 34-States of Islamic Military Alliance could play central role to bring all issues settled down faced by Muslims at Muslim countries and at Non-Islamic Sates consequently.

Both Islamic States are in the well enjoyed status to raise the voices in the favor of all Muslims being oppressed such as in Burma, Kashmir etc. The alliance of Pakistan and Saudi Arabia could be advantageous for the all Muslims if they work together to get all Muslims States united and settle down their issues on mutual talks. The most crucial task for Pakistan is to shrink the tension between Iran and Saudi Arabia in the larger interest of the Muslim Ummah in the 21st century.

Despite of all these facts, Pakistan and Saudi Arabia are in position to lead the Muslim Ummah and to get solved the all internal and external matters concerned to them and get them united to ease the tension between them and get rid of from all those problems which are hurdles for the Muslims Settled at Muslim States and Non-Islamic States accordingly.
